

Phenomena. K. 755. c. 10

Merlinus Liberatus.

BEING AN

ALMANACK

For the Year of our Redemption

1 7 4 2.

It being the Second after *Bissextile* or *Leap-Year*.

And from the Creation of the World, according
to the best of *Prophane History*, 5691.

And the 53d of our Deliverance by *K. William*
from *Popery*, and *Arbitrary Government*.

But the 46th from the

Horrid, *Popish*, *High-Church*, *Jacobite Plot*.

In which are contain'd the diurnal Motions of the Plan-
ets, Conjunctions, Lunations, Eclipses, more large
and exact than any other of this Kind. *Astrological*
Observations on the Twelve Months, and on the four
Quarters of the Year, Terms, Equation of Clocks,
the true Times of the Rising and Setting of the Sun
and Moon, with other Things fit for such a Work.

To which is prefix'd,

The Protestant Remembrancer, continu'd,
Calculated and referr'd to the Meridian of *London*,
Whose Latitude is $51^{\circ} 32'$ North.

By JOHN PARTRIDGE.

— Etiam Mortuus Loquitur.

LONDON Printed by R. PHILLIPS,
Company of STATIONERS

The Protestant Remembrancer,

Admiral VERNON'S Victory over the Spaniards.

NOW for some Ages had the Pride of *Spain*,
Made the Sun-shine on half the World in vain,
Whilst she bid War to all that durst supply
The Place of those her Cruelty made die :
Of Nature's Bounty Men forbore to taste,
And the best Portion of the Earth lay waste.
From the new World her Silver and her Gold,
Came like a Tempest to confound the Old ;
With accomplishing her vast Designs,
Europe was shaken with her *Indian* Mines :
Our Trading-Ships when sailing on the Main,
Were either plunder'd, stop't, or took to *Spain*,
When *Britain* looking with a just Disdain,
Upon his gilded Majesty of *Spain* ;
And knowing well that Empire must decline,
Whose chief Support and Sinews are of Coin,
Her native Force and Virtue did oppose
To the rich Troublers of the World's Repose.
But when in Seventeen Hundred Thirty Nine,
Our Naval Army, then set out for *Spain*,
They that the whole World's Monarchy design'd,
Are to their Ports by our bold Fleet confin'd :
From whence our Red-Cross they triumphant see,
Riding without a Rival on the Sea :
Others may use the Ocean as their Road,
The *English* only make it their Abode :
Our Oaks secure, as if they there took Root,
We tread on Billows with a steady Foot.

Mean while the *Spaniards* in *America*,
Near to the Line, the Sun approaching saw :
And hop'd their *European* Coast to find,
Clear'd from our Ships by the autumnal Wind.
Their huge capacious Gallies stuff'd with Plate,
The labouring Winds drove slowly towards their Fate.
At *Port à Belle* they their Guns discharge,
To tell their joy, or to call forth a Barge :

This

by Way of I N T R O D U C T I O N.

This heard our *Admiral*, tho' out of View,
As swift as Eagles to that Quarter flew :
So heedless Lambs which for their Mother's bleat,
Wake hungry Lions and become their Meat.
Arriv'd *, he soon began that tragic Play,
And with his smoaky Cannon banish Day ;
Night, Horror, Slaughter, with Confusion meets,
And in their sable Arms embrace the Fleets ;
Through yielding Planks the angry Bullets fly,
And of one Wound hundreds together die,
Born under different Stars, one Fate they have,
The Ships their Coffin, and the Sea their Grave.

Bold were the Men who on the Ocean first
Spread their new Sails when Shipwreck was the worst ;
More Danger now from Man alone we find,
Than from the Rocks, the Billows, or the Wind ;
They that had sail'd from near the Antarctic Pole,
Their Treasure safe, and all their Vessels whole,
In sight of their dear Country ruin'd be,
Without the Guilt of either Rock or Sea ;
What they would spare our fiercer Art destroys,
Surpassing Storms in Terrour and in Noise :
Once *Jove* from *Ida* did both Hosts survey,
And when he pleas'd to thunder, part the Fray ;
Heaven here in vain that kind Retreat should find,
The louder Cannon had the Thunder drown'd.
Some we made Prize, whilst others burnt and rent,
With their rich Lading to the Bottom went ;
Down sinks at once, so Fortune with us sports,
The Pay of Armies, and the Pride of Courts.
Vain Man ! whose Rage buries as low that Store,
As Avarice had digg'd for it before.
What Earth in her dark Bowels could not keep,
From greedy Hands lies safer in the Deep ;
Where *Thetis* kindly does from Mortals hide,
Those Seeds of Luxury, Debate and Pride :
And now into her Lap the richest Prize,
Fell with the noblest of our Enemies.
Our Admiral glad to see the Fire destroy,
Wealth, that prevailing Foes were to enjoy.

* *Admiral Vernon.*

A 2

The

The Cœlestial CHRONOLOGY.

IN the Year of our Lord 1077, 665 Years since, on the 27th of *March*, was a great Earth-Quake in *England*, did much Harm, and in the Winter following a Frost, that continu'd from the first of *November* to the middle of *April*, h =. 4 =. ♂ v.

Anno 982, 760 Years since, the *Danes* most grievously afflicted and infested this Kingdom, in which Year was a most miserable Famine, that People being driven to Extremity of unwholsome and unwonted Dyet, caused great Mortality amongst them, and Murrain amongst the Cattle. h in II, and R =. 4 m R and D ♂ in Ω, m = and m.

1085, 657 Years since, was a great Earthquake in *September*, which did much Damage, h w, 4 =.

1116, 626 Years since, the first of *November*, great Lightning and Thunder, and such a Storm of Hail fell, the People were wonderfully amaz'd therewith; and on the 13th of *December* following, a terrible Earthquake, at which Time Queen *Maud*, Wife to King *Henry I.* died, h in II R, 4 vs, ♂ = and m.

1133, 609 Years since, on the sixth of *August*, happened a great Earthquake in *England*, h = and Ω, 4 =, ♂ Ω.

1140, 602 Year since, was a great Eclipse of the Sun at *London*, upon the 20th of *March* at Noon, so that the Stars were seen, to the great Surprize of King *Stephen* and his Subjects at *London*, being in the 5th Year of his Reign.

1093, 649 Years since, the latter End of the Year, was an excessive Rain, causing great Floods, then a sudden Frost came, whereby the great Streams were congealed in such a manner, that at their Thawing many Bridges and Mills were broken down, h in =, 4 =, ♂ Ω D and R.

1149, 593 Years since, a very rainy Summer, that a Dearth followed, and *December* 10 a Frost began, which continued to the 19th of *February*, h Ω, 4 =, ♂ Ω and II.

1205, 537 Years since, on the 14th Day of *January* it began to freeze, and so continu'd 'till the 22d Day of *March*, with such Extremity, that Husband-men could not plow nor sow, which caused great Scarcity of Corn the following Year, h in X, 4 v, ♂ w and =.

The Cœlestial CHRONOLOGY.

1246, 496 Years since, on *St Mark's Day* was so great a Frost and Snow, which nipped the Leaves of Trees and Herbs in such extream manner, that for the most part they withered and faded away, h in Π , $\text{4 } \text{w}$ R, $\text{J } \text{H}$.

1247, 495 Years since, on the 13th of *February*, a great Earthquake about *London*, h Π , $\text{4 } \text{w}$, $\text{J } \text{w}$.

1274, 468 Years since, Thunder, Lightening, and Earthquake.

1275, *Dec. 5.* a great Earthquake, Thunder and Lightening.

1269, A great Frost from *November* 'till *February*.

1293, On the 14th of *May* a great Snow and high Wind.

1315, A great Famine, in the Reign of *Edward II.*

1389, A sad Famine for a whole Year, h Π and w R.

$\text{4 } \text{H}$, $\text{J } \Pi$.

1435, A vehement Frost, all Food came to *London* by Land.

1579, *April 24* fell a great Snow, a foot deep in *London*.

1698, A bad Harvest, frost and Snow, Barley not in at *Alballow-tide* in *Lancashire*.

1705, An exceeding dry Summer, h in O , Π , $\text{4 } \text{w}$
 $\text{O } \text{J } \text{v}$.

1709, A very severe Winter, h Π , $\text{4 } \text{w}$ m, $\text{J } \text{w}$.

1714, A very dry Summer, many Cattle died, h m,
 $\text{4 } \text{v}$, $\text{J } \Pi$.

1715, *April 22*, the greatest Eclipse of $\odot$ that ever was known at *London*, the Stars were seen.

1717, A very hot Summer, h w , $\text{4 } \text{w}$, $\text{J } \text{f}$.

1725, An exceeding wet Summer, h w , $\text{4 } \text{H}$, $\text{J } \Pi \text{w}$.

1727, *June 11*, King *George I.* died.

1731, The dryest *March* and *April* that ever was known.

1732, Little Frost or Snow in the Winter, Summer moderate.

1733, *Feb. 27*, Lightening, Thunder, Hail and Rain.

1735, A cold wet Summer, h O , $\text{4 } \text{w}$, $\text{J } \text{w}$, O .

1739, *October 23*, War declar'd with *Spain*, great Frost.

1740, Died the Pope, King of *Prussia*, Empress of *Russia*, and the Emperor of *Germany*.

1741, Great Preparations for War, Provisions excessive dear.

A Table of the Terms, and their Returns, for this present Year, 1742.

Hilary-Term begins Jan. 23, ends Feb. 12.

Returns, or Essoign Days.	Exc	Ret.	Ap.	W.D
In eight days of St <i>Hilary</i> , Jan. 20	21	22	23	Sat.
From the day of St <i>Hilary</i> in 15 days, 27	28	29	30	Sat.
On the morr. of purif. of blef. <i>Ma</i> Feb. 3	4	5	6	Sat.
In eight days of the purif. blef. <i>Mary</i> , 9	10	11	12	Frid.

Easter-Term begins May 5, ends May 31.

From the day of <i>East</i> in 15 days, May 2	3	4	5	Wed.
From the day of <i>Easter</i> in 3 weeks, 9	10	11	12	Wed.
From the day of <i>East</i> . in one month, 16	17	18	19	Wed.
From the day of <i>Easter</i> in 5 weeks, 23	24	25	26	Wed.
On the morr. of the <i>Ascen</i> . 28	29	30	31	Mon.

Trinity-Term begins June 18, ends July 7.

On the morr. of the holy <i>Trinity</i> , June 14	15	16	18	Frid.
In 8 days of the holy <i>Trinity</i> , 20	21	22	23	Wed.
From the day of h. <i>Trin</i> . in 15 days, 27	28	29	30	Wed.
From the day of holy <i>Trin</i> . in 3 weeks, J. 4	5	6	7	Wed.

Michaelmas-Term begins Octob. 23, ends Novemb. 29.

From the day of St <i>Mic</i> . in 3 weeks, Oct. 20	21	22	23	Sat.
From the day of St <i>Micb</i> . in 1 month. 27	28	29	30	Sat.
On the morr. of <i>All-Souls</i> , November 3	4	5	6	Sat.
On the morrow of St <i>Martin</i> , 12	13	14	15	Mon.
In eight days of St <i>Martin</i> , 18	19	20	22	Mon.
From the day of St <i>Martin</i> in 15 days 25	26	27	29	Mon.

N. B. No Sittings in *Westminster-Hall* on *Ascension-day*, *Midsummer-day*, the 1st and 2d of *November*, and the 2d of *February*.

The *Exchequer* opens eight Days before any Term, except *Trinity*, before which it opens but four Days.

Note, The first and last Days of every Term are the first and last Days of Appearance.

January hath XXXI Days.

Now *Mars* and *Jove* contend, jest not, be wise,
When Men in Power do frown, great Danger lies.
'Tis true, the Stars do often Mischief threat,
But Foresight still doth on Advantage wait ;
And After-wit is like a Shower of Rain,
That falls untimely on the ripened Grain.

Subtract from the equal Time.

The Year is ushered in with a conjunction of the Sun and Mars in Capricorn, two to one is great odds at — And Saturn and Jupiter Retrograde oppos'd by the Sun, ♂ and Mercury. Many wise Senators called to an account for male practice. Things seem to succeed ill in Italy. Many question'd for misdemean-
 The 20th Day of this Month, 1706, was born his Royal Highness, Frederick Prince of Wales.
 ors, Rapines, Thefts, and Treacheries. People complain of heavy impositions, their poverty seems great. Let the spirit of Division march into remote parts from us.

February hath XXVIII Days.

My Muse being more inclin'd to sigh than sing,
May she with Olive-branch glad Tidings bring.
For our late Discords, and unhappy Days,
And to *Jehovia's* Name give Laud and Praise.
Raise drooping Spirits and proclaim a Peace,
Remove the Cause, and the Effects will cease.

March hath XXXI Days.

This Month begins with windy stormy Air,
First Frost, then Sleet or Snow, the Middle clear.
With Morning Frost, but not continuing,
Then warmer Rain to usher in the Spring.
Nor yet at last is any settled Air,
But rather windy, *Stillborn* doth declare.

				3	Δ			15 ¹ / ₂	3 303	2 10	and Magnificence, as
									3 403	3 20	in Diebus Olim.

May hath XXXI Days.

Strange Consults, Controversies in debate,
Under religious Guise Men violate
Covenants and Leagues; intolerable Taxations
Oppress the Commonality in many Nations.
I hope we're free, let others take the Care,
Those under *Leo*, must mostly beware.

June hath XXX Days.

Some Treason, Murder, Strife, or horid Crime,
Doth *Mars* in *Taurus*, unto us design.

The two great Fortunes, they are now at odds,
And *Cerberus* he, lends Help to fetch the Rods;
From which there's Danger of intestine Jars,
For *Mars* is like a *Tory* 'mongst the Stars.

July hath XXXI Days.

The Stars are now inclin'd to rest a While,
 For *Mars* on *Venus* doth begin to smile;
 Except the Effects of other Months appear,
 This seems the quietest Month in all the Year.
 The Stars are Friends again, a thankful Voice,
 Will Farmer, Reaper, Carter, make rejoice.

In this Month I say,
 beware in time, and
 make your Hay while
 Sun doth shine. The
 fiery and airy Tri-
 plicities prevail, but
 they are all direct
 except ♀, and be-
 hold each other
 with friendly Rays.
 Things seem from
 hence at a quiet
 Stand, as if some Eu-
 ropean Powers were
 weary of their long
 and troublesome
 Broils. More Pre-
 ferments near this
 time conferr'd upon
 deserving Men, both
 of the Ecclesiastical
 and Legal Function
 A Marriage of Note
 in or near London:
 Let us hope well
 in England, when
 things are at the
 worst they will mend.

Partre

MD. 191725

The two Superiours here are most concern'd,
In these great Meetings of the heavenly Band:
Things futures, strange, if something be forgot,
Arts long, Times short, Pains great, then blame, me not

September hath XXX Days.

I hope proud Spain sees her Error now,
 Feeling the Smart of War, begins to bow
 Unto sweet Peace, which seems to court her so;
 I hope she's not so mad to let her go,
 But take her Offer whilst it is in Date,
 For fear she should repent when 'tis too late.

The Bald-pate Prophets of Rome are not idle in the Courts of Europe, and use the 7th Day of this Month 1742, was born the hopeful Princess Louisa, 5th Daughter to His present most gracious Majesty. all their Endeavours to poyson not only the Councils but the Ears of Princes also, with their pernicious Advice, in hopes to promote their lying Religion. The ♂ h♂ in MR, and all the Superiours Retrograde, will much alter the Affairs at Paris: Robbing by Land, Piracies by Sea, Unfaithfulness one to another, God preserve our King and Council. Amen.

C

Alfro-

PARTRIDGE, 1742.

'Astrological Observations of the Year 1742.

Of the Brumal, or Winter Quarter.

WHICH begins this Year 1741 at *London*, at such Time as the Earth toucheth the first Scruple of *Cancer*, or apparently when the Sun entereth *Capricorn*, *December* 10^h, 4^h, 31', 39", but the apparent Time is 1' 7" later, at which Time and Place we have ☿ 6° culminating, and ☊ 10° ascending, ♄ Retrograde in the 3d, ♀ R in the Second, both in ♈ ♂ on the Cusp of the Seventh, ☉ ♀ and ☊ in the Sixth, ♀ in the Eighth, and ♄ and ♈ in the Twelfth House of Heaven, ♄ and ♀ are both in their Detriment, ☊ is in the Seventh in ♊. ♂ ♀ ♀. This is the Face of Heaven at the Time of this melancholy Ingress, the Sun has now the greatest Declination and Amplitude, but least Altitude, short Days, and tedious long Nights for all those that are any ways afflicted with any Disorder either in Body or Mind; the ♄ being Lady of the Ascendent in the twelfth House, has Signification of many rash and unwary Actions, to beset those People and Places under the Sign *Cancer*, in which *Constantinople* is more immediately concern'd; this raises up cholerick Spirits to contend and villify those in Authority; Tumults, Insurrections, and Rebellion, are the common Actions of the inferior People, ♄ R in the 3d in ♂ to the ninth House, inclines many wicked People to rob both on the Land and Sea, to the great Loss and Damage of the honest and industrious well-meaning Subject. *Mercury* with *Cauda Draconis* in the Sixth, stirs up many Servants to rob their Masters; Death of Cattle is also hereby signified; Imprisonments, Banishment, or deposing of great Persons. I shall conclude this Quarter with a Word or two of Advice to his Holiness.

*Saturn's in Leo, and bids Rome beware,
A Storm's approaching, and is very near:
Let Chronus walk in State, Jove will him find,
To tell his Holiness he is unkind.*

The Apparent Time of this Solar Ingress is *March 9^d, 6^b, 26' 24"* at which Time at *London*, six Degrees of *Cancer* on the Midheaven, and five Degrees of *Libra* Ascending, h R in the 11th, u R in the 10th House, both in S , z in X in the 6th, *Sol* near the Cusp of the Descendant, *Venus* and *Mercury*, both Retrograde in the Western Angle, Moon in the 12th, applying to an Opposition of the Sun, G in the 11th, $\oplus$ in the 6th House; this is the Face of Heaven at the Time of this Vernal Ingress: All the Planets essentially weak, and four Retrograde will be the *Prodromus* of very prodigious Effects, and these to happen to those People under the Signs ♊ , ♋ , and ♌ ; now 'tis well known to Astrologers, that *Austria*, *Lisbon*, *Vienna*, *Italy*, *Sicily*, *Bohemia*, *Rome*, *Turky*, *England*, *France*, *Germany*, *Denmark*, are the Places concern'd, and Position of the Horoscope of any Place on the seventh Angle, naturally denotes *Broils*, *Wars*, and many Contentions. The

PARTRIDGE, 1742.

four Cardinal Points are Angular in this our Vernal Figure, and they are by the Learned call'd moveable Signs, therefore the Mischief threatned by these Positions, will the sooner pass over, and be the less durable; Time must unvail the Mystery; for, *Tempus omnia re-velat*. The Position of ♄ in the sixth, stirs up many ill-minded Servants to Acts of the baser Sort, it will be difficult for Masters to trust them any further than they can see them: As also all Manner of lesser Cattle are detrimented thereby.

It is the Opinion of the Learned, that many Mysteries ascribed to our own Inventions, have been the Courteous Revelations of Spirits: For those noble Essences in Heaven, bear a friendly Regard unto their fellow Nature on Earth, and therefore believe, that those many Prodigies and ominous Prognosticks which fore-run the Ruins of States, Princes and private Persons, are the charitable Premonitions of good Angels, which more careless Enquires term but the Effects of Chance and Nature. And if so, as we ought not to admire some new Inventions in the World, so on the other Side, they are much to blame who slight and contemn those *Prodigious* Apparitions that have been in our Days, as Comets, Eclipses, fiery Darts, great Conjunctions, &c. I say so admirable, and such grand Prodigies very rarely Appear, but they are attended with answerable Effects: For *Cardan* tells us, if the Causes be Great, then will succeed as great Effects, and that it were ridiculous to believe that great Effects could be expected but from great Causes, which might give a serious Admonition unto this Nation, *viz.* to all Persons of every Degree and Quality, to amend their Lives; for such Signs as God sends from Heaven are most formidable: If a Scarcity, Dearth, or Mortality of Mankind (which are always the Companions of War) should invade us, how terrible would it be, from all which Judgments let us pray, *Libera Nos Domine*. Let us therefore resolve to live in Unity amongst ourselves, and submit to the Power that protects us, and which God Almighty has set over us: For all Power is of God, *Rom.* 13, 1.

Bm

PARTRIDGE, 1742.

*But what's the Proverb? Certainly those shall,
That make a Pit for others, in it fall,*

The Summer-Quarter.

THIS Quarter begins when the Sun apparently enters the first Scruple of *Cancer*, which happens this Year 1742. on *Thursday June 10.* 33' 17" past 5 in the Afternoon, but the Apparent Time is 1' 9" sooner, at which Time at *London* we have 23° of the Cœstial *Virgin* culminating, and 29° of *Scorpio* ascending *Saturn* and *Jupiter* in Ω in the 9th House, δ and ζ in 8 in the 6th *Sol*, *Mercury* and $\oplus$ in the 8th House, *Moon* in $\approx$ in the 3d, applying to ρ η and ψ , ζ $\square$ ψ add $\square$ η , ζ add $\ast$ δ , *Caput Dragonis* in the 7th, and *Cauda* in the Ascendent, thus do the Heavens behold us at the Time of this Ingress. All the Planets except ζ are essentially Weak, *England's* Ascendent possesseth the 5th House, which is the House of Mirth and Jollity, signifying that too, too much Money (which ought to be put to better Uses, viz. in feeding the Poor) will be expended in the promoting of Plays, Interludes, Masquerades, &c. to the very great Shame and Scandal of a Christian Nation.

*Who gives a giddy Multitude the Reins,
O'whelm the State, betrays his want of Brains.*

The *Moon* disposed of by η , and add ρ ψ is a bad Position, all the Balsam is the Application of $\ast$ δ , but they are both in Cadent Houses; and as in this Quarter there will be celebrated a famous Conjunction of the two Superiors η ψ near that violent fix'd Star the *Lion's Heart*, it being of the Nature of *Mars*, it may be deemed a triple δ , or a Conjunction of η , ψ , δ but more of this by and by. This Position I say, looks with an angry Aspect, to those People and Countries under the Sign Ω , and being in the Ninth House, stirs Mens Minds to fiery and furious Actions,

PARTRIDGE, 1742.

to War, Battle, Treachery, Murder, Rebellion, and the like, more particularly upon the Seas, which Occasions the Poet to sing.

*Our Wooden World o'er Spain doth now prevail,
The foaming Billows of the Seas they Scale :
We Shots and Billows continually renew,
That we those hateful Monsters may subdue.
Unconquered Courage of our noble Hearts,
Who will perform our own, and others Parts:
Nothing will more than good Example then,
Pointing the Way to Glory to our Men.
One of our Men would with a daring Hand,
Have stopt the Spanish Fleet, and made it stand ;
Alone he durst the Cowardly Host defy,
So much their Courage he did villifie.
The Hand cut off which held the threatening Sword,
Falling i' th' Sea did a strange Sight afford :
It brandish'd still the Sword, and grasp'd it fast,
Till Hand and Sword together sunk at last.
Heads sever'd as they fell, were heard to cry,
Let Britain live in long Prosperity.
They who thus fell, against proud Spain did sing,
God save the British Fleet, and George our King.*

When Mars shall be Lord of any Revolutions, and in ♄, (a cold and earthly Sign) he bids good St. Patrick beware, and all his Hibernian Admirers, for he causeth much Rain, and a Corruption of Things that grow upon the Earth useful for Mankind, and renders the Designs and Projects of many Men frustrate. And being in the Dignities of ♀ he stirs up Debauchery, Treachery, and Perfidiousness to be used amongst the Female Sex ; and thus Fortunes Wheel goes round, some without cause Complain for want of Trade or Money, others are resolved to take no thought for to Morrow ; the Merchant that ventures his Estate in the wide Ocean, may fear to hear of the Loss of many a rich Ship, either by Piracy or Wreck.

This Season according to its proper Nature is hot and dry, turning the Humours of Mens Bodies into such Qualities,

Qualities, resembling the Element of Fire, and the Cholerick Complexion in Man, and it is Assistant in bringing all Fruits to their Ripeness, Cattle to their Fatness, and Men (if they will be but diligent and industrious) to be Masters of Wealth.

*Labour in Summer, take Pains with the Ant,
Else in Winter live Poor and in Want.*

Of the Autumnal or Harvest-Quarter.

THIS Quarter begins on Sunday, September 12, 49' 31" past six o'Clock in the Morning, but the Apparent Time is 7' 40" later, at which time at London, we have 13° of Cancer on the Midheaven, and 10° of Libra Ascending in the East: All the Planets are above the Earth, ♄ and ♀ Conjoyn'd in ♊ in the 11th House, ☉ and ♀ in the 12th, ♂ ♃ and ⊕ in the 10th, here the four Cardinal Points are Angular, England's Horoscope possesses the West. If Paris be under ♊ as Astrologers affirm, then the Triple ♂ in the House of Friendship will much abate the Troubles and Hardships that those People have lately undergone; the Reception of ♀ and ♀ has Signification of some great Meeting concerning Privilege, Property, and Points of Law. The Moon is Lady of the 10th with ♂ in his Fall, here the common People (signified by the ♃) will be incited to War, to stand up in Defence of the Rights of their Prince and Country; the Ascendent of Spain is upon the Cusp of the Third, poisoned with the Presence of the Dragon's Tail, that haughty People will be brought to truckle to those whom they had thought to have had the Mastery over. And altho' we find ⊕ in the 10th, by reason of the Presence of ♂, many that would climb the Cedar will be obliged to lye down with the Shrub.

*For Favour's but a slipp'ry Thing, a Blast,
None stands so sure, but may slip down at last.*

PARTRIDGE, 1742:

This Season is by Nature cold and dry, and therefore the Sanguine are now best in Health, and the Melancholy subject to Distempers: This Season is best for young People, and worst for those that are aged; if now there be frequent North Winds, and dry Weather, then are Men and Women, of a Phlegmatick Constitution, best in Health, but Persons of other Constitutions are subject to Fevers, and other Distempers incident to their Nature.

In the Month of *September*, eat all manner of Meats, or Fruits that your Appetite or Stomach desires; for all Things are now in their proper Vigour and Perfection. 'Tis good to purge, and to this end is highly commendable, the Flower of *Cassia* new drawn, that gently purges and comforts Nature; and if you use Cordial Powders in your Broaths, these will preserve the Body sound in all Winter. In *October* the Body waxed dry, and the Brain moist, therefore 'tis good to eat roasted Meats often. Now you may drink new and pleasant Wine; and let Blood, and purge as Occasion requires. In *November* Melancholy increaseth much, and Blood decreaseth, 'tis therefore good to Vomit sometimes; Eggs and Honey are now very wholesome, and Salt-powder'd Meats may be eaten without Danger; but avoid Bathing, for now the Blood is most restrained in the Arteries, and sweating in hot Houses or Bathing, stirs up the Humours, and provokes Distillations from the Head, and causes Dimness of Sight, and Pains in the Head and Eyes.

Thus doth the Vigour of these Signs Superior, Rule on the Bodies of Things here Inferior.

*But all are govern'd by God's Sovereign Might,
He's happy then that understands them right.*

**Of the Eclipses of the Sun and Moon that will
happen in the Year 1742.**

Within the Circumference of this Year, there will be four Eclipses of the Luminaries, two of each Light, but invisible at *London*, they happen in the following Order.

The

P A R T R I D G E, 1742.

The first Eclipse is of the Moon, on Saturday at 41' past Two in the Afternoon, the 8th Day of May; the Eclipse will be but small in it self, scarce two Digits on the South or Lower Side of the Moon's Body, and 'tis over before the Moon rises, consequently not visible at London; but in the Eastern Parts of the Globe it may be seen.

The second Eclipse is of the Sun, on Saturday the 22d Day of May, 53' past 12 at Night; this will be a great and Central Eclipse, but not seen in Europe.

The third Eclipse is of the Moon, and falls on Monday November the 1st, a little past Noon; it is invisible at London, the Moon will be more than half darken'd on the North or Upper-side.

The fourth and last Eclipse this Year is of the Sun on Tuesday the 16th Day of November, about Six a Clock in the Morning; the Eclipse will be over before the Sun rise, and therefore invisible at London; but in the Southern Part of the World it will be seen Central and Annular.

As these Eclipses are all invisible to us, their Effects cannot be of any great Signification, I shall only Remark, that the Places under the Eclipsed Signs M , II , V , and I , are Norway, Bavaria, Fesse, Catalonia, Algiers, Valentia, Spain, Hungary, Russia, Ireland, Persia, Sardinia, Flanders, Brabant, Egypt, London, and Bruges.

The publick Transactions of Europe stand much unsettled, and in somewhat an uncertain Posture at the Writing hereof; and great Turnings and Windings appear in very many of the grand Concernments of these Parts of the World. — If in this Year there be a firm and lasting Peace, it will be well. It is my humble Opinion, that too, too many now see their Error, those who cried aloud for War would now (when too late) be more glad to hear of a Universal Peace; my Reason is, because War begets Poverty: For in our Days never was Trading so dead, nor Food of all sorts more dear, than is at the Writing hereof. But

*If Spain thinks well her Lot to take,
A Truce we'll bold, or make her quake;
Her Lot is this, she must comply,
With what we do, or else must fly
Into the dark Regions below,
'Tis in our Power, we'll have it so.*

Besides

P A R T R I D G E, 1742.

Besides these Luminarian Eclipses, the Moon will make a near Appulse to the Planet ♄ on the 23d Day of May, between Eight and Nine a Clock in the Morning, the Moon will pass under that Planet, but they being too near the Sun to be seen. Also on November 15, near Two in the Morning, the Moon, Venus and Mercury, are near together; but they being too near the Sun to be seen any where with the naked Eye. And on June 18, between Two and Three in the Afternoon, the Moon will pass under ♃, this is visible with good Glasses only in America. The Moon passes wide of ♃ and ♄ all this Year.

Of the famous Conjunction of Saturn and Jupiter this Year.

IN this Year 1742, there happens a notable Conjunction of the two superior Planets, Saturn and Jupiter, in the fiery and regal Sign Leo, it falls on Wednesday the 18th Day of August, according to the following Calculation.

August 18 } 8 46 48 E. Time. } in ♎ 26° 58' 26"

Those two Planets are Direct and Orient, are under the Sun's Beams, and consequently cannot be seen with

PARTRIDGE, 1742.

with the naked Eye. *Saturn* will be elevated above *Jupiter* $28^{\circ} 12''$: This Conjunction falls near that violent fixed Star the *Lion's Heart*, which is of the Nature of *Mars*; it is a most famous Conjunction, and certainly will be attended with very signal Effects. Conjunctions of *Saturn* and *Jupiter* do convert and change Things, saith *Almansor*. The first Conjunction of the grand Planets in the fiery Trigon, called by Astrologers, the Seventh or Sabbatical Return, was upon the 7th Day of *December* 1603, and 'tis rational to judge that some great and notable Work concerning Religion, should be Part of the Effects of this eminent Conjunction, which should continue about 20 Years, and not only *Europe*, but the whole World will be concern'd therein. This Congress of the Planets, in the great Dignities of the Sun, must certainly have as glorious Effects. One Thing considerable as to our Nation, did follow the Conjunction of *Saturn* and *Jupiter* in *Sagittary* 1603, which was the happy uniting of *England* and *Scotland*, by the coming in of *King James* the First; but seconded with a great Plague in *London*. The second Conjunction in the fiery Trigon, was on the 7th Day of *July* 1623, in and about 7° of Ω . During the Effects of which Conjunction we had both Peace and Plenty in our Land, and often courted by many Ambassadors, desiring a continuance of Amity and Friendship. The third Conjunction of the Superior Planets, was upon the 15th of *February* 1643, in about 25° of π ; this Conjunction fell out of Course, it should have been in ν , but meeting in an Acquatick Sign, did quench, or allay all those general good Accidents the two former Conjunctions did fore-shew. Under the Influence of this Conjunction, the Civil War in *England* broke out, which came to such a Height, that *King Charles I.* was beheaded before his own Palace Gate. The fourth Conjunction was in $\nearrow 13 47$ *October* 11, 1663, according to *Laur. Eichstadio Ephemeris*. It was usher'd in with two or three Comets, and shortly after followed the great Plague in *London*, and the most prodigious Fire that ever happen'd in that famous City. The fifth Conjunction of these two Planets was, *October* 20, in $19^{\circ} 55'' \Omega$ according to our *English Merlin*, Anno 1682, but according to *Gadbury*, *October* 9, in $19^{\circ} 2' \Omega$. And by a Retrograde

PARTRIDGE, 1742.

grade Motion they met again in $16^{\circ} 54'$ Ω *January 30,* 1683. A third Meeting they had in $14^{\circ} 24'$ Ω by a direct Motion, *May 2,* the same Year, it is well remembered by many now living, what followed this Triple Conjunction, *viz.* the Death of King *Charles* the Second. 13 Weeks Frost, and the troublesome Reign of King *James* the Second; the Abdication of that Prince; the coming in of King *William*, of glorious Memory, with many other remarkable Circumstances; the Plot, for Assassinating King *William* III, for which *Charnock*, King, *Keys*, Sir *John Friend*, and Sir *William Perkins*, were drawn, hang'd and quarter'd; and lastly, the Death of that glorious and heroick Prince happen'd under the Influence of this Triple Conjunction in the Fiery Trigon. The sixth Conjunction of η and ψ was 1702, *May 11,* in γ $6^{\circ} 40'$, they kept near together all that Year; Here it is well remembred, how the Allies under the command of Prince *Eugene* and the Duke of *Marlborough* beat the King of *France* to purpose; then followed a Peace, and the Deaths of Queen *Anne*, of *Lewis XIV.* King of *France*, and one of the greatest Solar Eclipses that ever happened at *London* in any Age. And now came in the *Hanover* Line, whom God long preserve: The Rebellion began in *Scotland*, and the Earl of *Mar* defeated near *Dumblain*, and a Skirmish with another Body of Rebels at *Preston* in *Lancashire*, *November 13,* and *14,* 1715, commanded by the Earls of *Derwentwater*, *Kinsmore*, and *Nithsdale*, which were taken Prisoners, sent to the *Tower* of *London*, tried, and found Guilty; and on the 24th Day of *February* next following, the two first were beheaded on *Tower-Hill*, and *Nithsdale*, the Night before, made his Escape in *Womans* Apparel. And in the Year 1720, was transacted the Memorable *South-Sea Bubble*; the People were now got to such a Height of Madness, that the like was never known in any Age of the World that we know of, every one striving to undo his Neighbour; some getting Riches, others losing their All; some set up Coaches, making the old Proverb good, *Set a Beggar on Horseback and he'll ride apace*; whilst many a good and ancient Family were obliged to part with their All, to keep their Bodies out of a Jail; these were the dire Effects

P A R T R I D G E, 1742.

Effects of this Conjunction which was made in *England's* Horoscope; the Child unborn will have cause to remember, having lost his Birth-right to many a brave Estate. *For from the least of them, even to the greatest of them, every one is given to Covetousness; and from the Prophet even unto the Priest, every one dealeth falsely,* Jer. vi. 13. The seventh Conjunction of h and V in the fiery Trigon was made the 27th Day of *December* 1722, at 7^h 40 P. M. according to S. S. in f $23^{\circ} 41' 6''$, but according to A. C. Dec. 29, 9^h 26' 24", in f $24^{\circ} 3' 25''$, *Saturn* was elevated above *Jupiter* 48' 16"; and *Mars* was at the same Time in f $22^{\circ} 37' 51''$; this famous Conjunction was celebrated in the Horiscope of *Spain*; under the Influence of this Triple Conjunction were transacted more Depredations by the *Spaniards* upon our *English* Merchant Ships than has been known in any Age, which are now fresh in every Man's Memory, till our Gracious King was pleased, for the Good and Safety of his Majesty's Trading Subjects, to put a Stop to the Career of those haughty Dons, by declaring War against them; and our brave Admiral *Vernon* has given them such a Blow, that we hope will keep them under, from ever disturbing our Navigation any more.

The Eighth Conjunction of h and V is, according to the above Calculation, it is here very remarkable, that all the Planets (except the $\odot$) are in S and O ; the Places subject to these Signs are, *Scotland, Holland, Russia, Africa, Constantinople, Alpes, Italy, Sicily, Bohemia, Turkey, Rome, Prague.*

The ninth S of h and V will be the 7th of *March* in 12°V , Anno 1762, *Jupiter* will be elevated above h $1^{\circ} 7'$, they are Evening Stars and under the $\odot$ Beams. The tenth and last S in this Trigon is ~~October 27, 1782~~ *6 Nov* 1782, in 28°f , they are Evening Stars, and may be seen in the Evening after Sun-Set, h will be elevated above V 46', and then they leave this and enter the Earthy Triplici *July* 9, 1802, in v 6° ; they are Evening Stars, and may be seen Westward after $\odot$ Set, h will be elevated above V 37'. And thus have I given the Times of the S of h and V through the Fiery Trigon, which may suffice at this Time.
